

0303

*** FOR PRIMARY WINDING WITH SOLID CORE WIRE AND SLEEVING**

The solid wire inside the sleeving is coated with polyurethane and needs to be stripped away and tinned if the leads are shortened.

Note: A certain amount of mechanical hum is prevalent in mains transformers and can be amplified when bolting to your metal work. Therefore you may find a small rubber gasket or similar material is worth fitting to quieten this hum to its' minimum, but please ensure the frame is grounded to the supply safety earth.
