

Connection Diagram

EU Primary	,	WW Prim	nary				
250V	Brown——	120V	Brown		Orange 1	240\/	0.8A max.
230V	Red	110V	White 2———		- Orange 1	340V	U.OA IIIax.
210V	White————————————————————————————————————	0V	Black———		- Orange 2 -	340V	0.15A max.
		120V 110V	Red————————————————————————————————————		- Pink -	70V	0.15A max.
10V 0V	Blue Black	0v	Blue		Yellow 1	6.3V	5A max.
	Yel/Grn Electrostatic		Yel/Grn	\	Yellow 2	6.3V	5A max.

Notes

Visual identification – Worldwide version has two white leads, European version has one.

Worldwide connection options:

- \bullet 110v N: join Blue and Black, L: join White 1 and White 2, isolate Red and Brown
- $^{\bullet}$ 120v – N: join Blue and Black, L: join Red and Brown, isolate White 1 and White 2
- \bullet 240v N: Blue, L: Brown, join Red and Black, isolate White 1 and White 2 European connection options:

For mains voltages of 210v, 230v or 250v use Black as Neutral. For 200v, 220v or 240v, use Blue.

ALWAYS isolate all unused leads SEPERATELY FROM EACH OTHER
