

Connection Information

Type: **1160**

Further Information:

1160 – SE Plate to Balanced Line, 15kΩ:150Ω+150Ω

Output transformer for driving a balanced line from a single-ended triode stage.

100% M6 core for high level capability. Can be configured for 5:1 or 10:1 ratios.

Multiple interleaved winding sections for high bandwidth.

Max Output Level @30Hz: +26dBu
