

**1161x**

**1161 Push-Pull triode to balanced line 20k/150+150**

20k/150+150 ohm output transformer for driving a balanced ohm line from push-pull 6SN7, ECC82 ECC83 etc. 100% M6 core for high level capability, Max output level at 30 Hz +37 dBu. Multiple interleaved winding sections. for high bandwidth. Total dc resistance ref secondary 54 ohms. Package options. Size "D"
