

1235x

1235 75+75/600 Output Transformer

High level line output. Ideal for isolating outputs or can be driven from a single or pair of op amps. Faraday shields for high CMR +34 dBu output level. Can be configured as 75/600 Ohms (primaries in parallel) or 300/600 Ohms (primaries in series). Replacement for Neve LO1173.
