

4243f

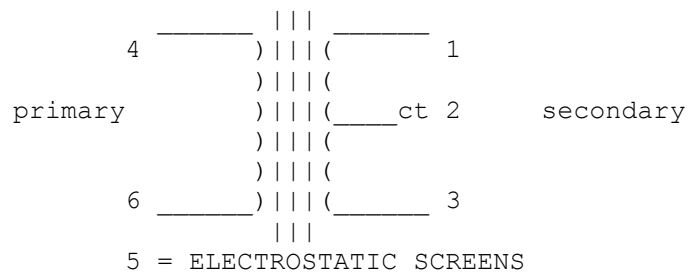

DO NOT screw into transformer more than 3mm

4243 DI Box transformer 10:1

For connecting high impedance device such as a guitar pick-up to amplifier.
Ensures that pick-up sees a high impedance load and provide hum/buzz isolation.
Enables long leads from Guitar to be used without loss of signal quality.
Can connect to balanced or unbalanced inputs. +34 dBu

The data sheet can be viewed on our website www.sowter.co.uk
Search Type Number then click on 4243
