

# 4383f

BLACK = ELECTROSTATIC SCREENS

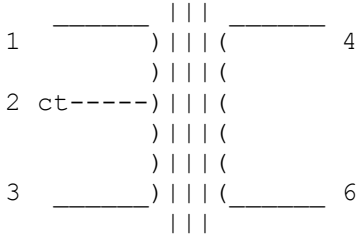

**DO NOT** screw into transformer more than 3mm

**4383** 600/10k 1:4 Mic/Line input transformer.

May be used for 1:4 voltage gain for a mic/line input or used in reverse for matching a CD player or sound card to a 600 ohm line. Suitable for Teletronix LA-2A Comp. 600/10K input. Total dc resistance 112 ohms ref primary. High performance Sowter generic transformer similar to Triad HS-29. Line input transformer for tube, IC or transistor amplifier. CT input for providing phantom power to microphone etc. Mumetal can. +16 dBu on 600 ohm side.

The datasheet can be viewed on our website [www.sowter.co.uk](http://www.sowter.co.uk) Select online shop, search 4383, click on 4383 then click on datasheet.

**4383c**

5 = ELECTROSTATIC SCREENS (spot)
