

Connection Information

Type: **4584**

Further Information:

600Ω High-Level, Low Loss Isolation Transformer, for electrical isolation where source and load are low impedances. For reduction of most kinds of noise caused when equipments are connected together. Suitable for use as an amplifier output transformer. Can help to ensure Electromagnetic Compatibility (EMC) standards compliance. May be used for balanced/unbalanced conversion and vice versa.

Ratio – 1CT:1CT, Connection – Octal Base
