

7114f

7114f: A multi-tapped Mic Input Transformer

Basically a modified type 3678 with secondary increased for 10k use. (see 3678 data sheet at <http://www.sowter.co.uk/specs/3678.htm>)

So:

for 600 ohms tap	turns ratio 1:4.1
for 200 ohms tap	turns ratio 1:7.12
for 60 ohms tap	turns ratio 1:12.94

For a ribbon mic you probably need our type 8754 (see <http://www.sowter.co.uk/specs/8754.htm>) or one of the other Ribbon Transformers on our website
