

**8650a**

**8650 PP triode to balanced line 9CT:1**

15k/185 ohm output transformer for driving a balanced ohm line from push-pull 6SN7, ECC83 etc. 50% Mumetal core for high bandwidth and dynamic range, Max output level at 50 Hz +28 dBu (19 volts). Total dc resistance ref secondary 14 ohms. Colour coded leads. Size A

The data sheet for this transformer can be viewed on our website.
