**8920 Input phase splitter 1:1+1 100% balance** 10k/10k+10k input transformer with two identical outputs for driving a balanced amplifier.

Two chamber bobbin ensures 100% balance over the full bandwidth.

May be used as a high impedance spliter or combiner. +26 dBu Mumetal can.

The datasheet can be downloaded from the website www.sowter.co.uk
