

9560

9560 Single Ended triode to line output 3.75:1

8k/600 ohms single ended output transformer. 50 H primary. Up to 45 mA dc.
Max output +26 dBu (18volts). Total dc resistance ref secondary 93 ohms.
Identical primary to 9040 but reduced ratio. Will give greater output with slightly increased output impedance. Reflected anode load may be adjusted by using a secondary load resistance.
Colour coded leads. Size H. M6 core.
