9765 Langevin AM16 Output Transformer

High performance configurable transformer for repair or reconstruction of the Langevin AM15 microphone/line amplifier. Incorporates 4 tightly coupled primary windings for this push-pull split load transistor circuit. Output configurable for 150/600 ohms.

Max output level +35 dBu at 50 Hz. Mumetal can 45 mm dia x 52.5 mm high. Colour coded leads.
