

Quality Policy

The Quality Policy of Carnhill is as follows:

Carnhill designs and manufactures a comprehensive range of high quality wound components that comply with the demands of the international electronics industry.

Carnhill Transformers Ltd is committed to fulfilling the expectations and needs of our customers.

We demonstrate this by manufacturing quality products, providing design expertise, and delivering precisely to instruction.

Our commitment to continuous improvement through our longstanding quality management system helps us to achieve this. The framework is built on meeting the requirements of the quality standard ISO9001

Long and short term Quality Objectives are reviewed regularly to set achievable targets and goals that improve and grow the business

We are committed to continuous improvement of the quality management system through training and regular reviews.

We see investment in plant, machinery and IT facilities as vital to increasing efficiency.

We believe in relationship driven working with our customers to increase overall satisfaction.

These objectives are reviewed regularly at management meetings along with other specific targets defined in the Quality Management System. As Managing Director, I provide focus and support together with the resources necessary to ensure that all of us in the group can expand our position as a leading quality supplier in our sector.

I have assigned the day-to-day management of the system to the Carnhill Management Representatives.

John Hall
Managing Director, Carnhill Transformers Ltd
